Dear Manager:

This letter is to express my interest in your posting for a University Graduate Hire - Software & QA Engineer (SS&S)

I graduated from NC State University with a Masters in Computer Science in December 2017 and am working as a Software Engineer at INTEL. I have 1+ year of experience developing and deploying complex AI software solutions for clients at Intel. Also, I am a certified AWS Solutions Architect.

Moreover, with a Master's degree in Computer Science along with hands-on experience developing and deploying Intel's AI on AWS using Ansible and modern DevOps techniques and building a complete DevOps pipeline to deploy a NodeJS and a Java Application I am confident I will be a great asset to your organization.

I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

Your listed requirements closely match my background and skills.

I've attached a copy of my resume that details my projects and experience in solutions development. I can be reached anytime via my cell phone, 919-945-6947 or via email at vbhat@ncsu.edu.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,
Vivek Bhat
