Dear Manager:

This letter is to express my interest in your posting on jobs.ncsu.edu for a DevOps Developer.

With a Master's degree in Computer Science and hands-on experience deploying Intel's Saffron (saffrontech.com) on AWS using Ansible and modern DevOps techniques and building a complete DevOps pipeline to deploy a NodeJS and a Java Application I am confident I will be an asset to your organization.

I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

Your listed requirements closely match my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

- Undergraduate or graduate student; status attention to detail; ability to work carefully and independently
- Experience with Linux. Experience with virtualization, software provisioning, configuration management, and application deployment: I have a good industry level experience of deploying huge application on the fly using tools such as Ansible, Jenkins, Vagrant, Docker etc.
- Experience with Vagrant and Ansible. Experience with programming languages like Ruby, Python, and PHP: I have worked for a year and am working on Expertiza which is an open project with more than 250 developers which a Ruby On Rails project.

I've attached a copy of my resume that details my projects and experience in software development. I can be reached anytime via my cell phone, 919-945-6947 or via email at vbhat@ncsu.edu.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,

Vivek Bhat
