Dear Manager:

This letter is to express my interest in your posting on Intel's internal Jobs and Opportunities for a Sr. Cloud DevOps Engineer.

With a Master's degree in Computer Science, and hands-on experience using DevOps Techniques to create and implement cloud solution for Intel Saffron, I am confident I will be an asset to your organization.

I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of the organization.

The requirements you listed, closely match with my background and skills. A few I would like to highlight that would enable me to contribute to your bottom line are:

- Implementation of configuration management software (Ansible, Chef, Puppet, etc.).
- Deep experience in Amazon Web Services (AWS) technologies: Cloud Formation, S3, Autoscale, Cloudwatch, etc.
- Thorough understanding of data structures and algorithms
- Working knowledge of container technologies (Docker/Warden/Kubernetes).
- Proven track record of proper documentation for future maintenance and upgrades

I've attached a copy of my resume that details my projects and experience. I can be reached anytime via my cell phone, 919-945-6947 or via email at vbhat@ncsu.edu.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Sincerely,
Vivek Bhat
